

FOOD SECURITY IS NATIONAL SECURITY

American Agriculture Feeds the World & Strengthens America

OUR MISSION

Farmers for Prosperity brings together leaders from across the agriculture sector to champion U.S. global engagement through food assistance, diplomacy, and agricultural research. Launched by USGLC in partnership with Cargill, the network advocates for smart investments that feed hungry people, expand markets for U.S. producers, and protect America's national and economic security.

**“We feed the world.
We lead the world.”**

Brooke Rollins
U.S. Secretary of Agriculture

THE STAKES

1 IN 12

Global hunger affects close to one in twelve people

40%

Estimated share of global food assistance supplied by American growers

176 BILLION

U.S. agricultural exports in 2024

WHY U.S. GLOBAL LEADERSHIP MATTERS TO AGRICULTURE

Making America **Safer**

A 25% rise in food insecurity can increase the risk of conflict by **36%**

Hunger fuels displacement, disease, and violence. U.S. food assistance and diplomacy build stability before crises threaten American interests.

Making America **More Prosperous**

Food for Peace purchases close to **\$2 billion** in surplus commodities each year

These food assistance programs give American producers a reliable market today and help build the customers, trading partners, and allies of tomorrow.

Harnessing U.S. **Agricultural Innovation**

Every \$1 invested in U.S. agricultural innovation labs **returns \$8** to U.S. taxpayers

Agricultural research in the U.S. and in collaboration with our international partners strengthens crops resilience and helps detect pests and diseases before they reach U.S. farms. Today, 60% of U.S. wheat comes from seeds developed by such research.
